EXPERIENCE

Lead Backend Engineer

SmartRez Booking (Monologix) - Laravel, Redis, AWS

📅 Aug 2022 – Present

📍 Remote

- Designed and implemented the core slot availability engine, including overlapping bookings, group capacity restrictions, blackout periods (weather/maintenance), and rescheduling workflows.
- Architected a multi-tenant system where operators could onboard themselves, configure rental products, manage shared resources (e.g., cars, jet skis), and embed booking widgets on their own websites.
- Enabled real-time inventory and pricing logic, including seasonal and promotional rate sheets.
- Developed admin tools for managing bookings, blocking time ranges, resource maintenance, and internal communications.
- This product now supports dozens of operators, each running their own fleet-based booking systems on the same codebase.

Lead Backend Engineer

Wholesale Helper (acquired by Shop Circle) - Laravel, Redis

📅 Sep 2021 – Present

📍 Remote

- Led migration from monolith to modular Laravel microservices, now powering 12K+ Shopify merchants and 600K+ users.
- Migrated over 60 million records during refactor without any downtime.
- Helped grow ARR from 40K B2M by delivering high-impact features.
- Scaled engineering team from 6 → 30 pre-acquisition, then integrated into 250+ team post-acquisition.

Backend Lead

ClearGlass Analytics - Laravel

📅 Oct 2018 – Nov 2019

📍 Bengaluru

- Built a greenfield analytics platform using Laravel, working closely with the founder and product team.
- Promoted agile practices and CI/CD workflows for reliable delivery.

Frontend Developer (Intern)

PlexusMD - Laravel & React

📅 Dec 2017 – Mar 2018

📍 Ahmedabad, Gujarat

- Developed React-based landing pages for their medical video platform, and contributed to their mobile app built with React Native.

EDUCATION

M.Sc. in Information Technology

Dhirubhai Ambani - Institute of Information and Communication Technology (DA-IICT)

📅 April 2016 – April 2018

📍 Gandhinagar
